

Double Valve Aspirator

For uterine evacuation and endometrial biopsy

EFFECTIVE · DISPOSABLE · AFFORDABLE · VERSATILE

MANUAL VACUUM ASPIRATION

Clinical Indications

- Treatment of incomplete abortion for uterine sizes up to 12 weeks since the woman's last menstrual period
- Endometrial biopsy

Discreet and Patient-Friendly

- Quiet procedure meets patients' needs for privacy
- Enables faster recovery times compared to operating room procedures

Safe and Effective

- 98% effective with low complication rates*
- Safe alternative to sharp curettage

Affordable and Versatile

- Reduces procedural costs by performing procedures in an outpatient setting
- Low initial investment and per-use cost

* In less than 2% of cases one or more of the following can occur during or after the procedure: uterine or cervical injury, pelvic infection, vagal reaction, incomplete evacuation, or acute hematometra

Double Valve Aspirator

- Individually wrapped and disposable
- Ready to use and sterile packed
- 60 mL volume
- 610-660 mm (24-26 in) Hg vacuum
- Latex-free plastic
- FDA-cleared, CE-marked, and ISO 13485 compliant

THE IPAS ASPIRATOR PRODUCT LINE

A COST EFFECTIVE SOLUTION FOR UTERINE EVACUATION¹

- Backed by 40 years of global market use and Ipas' long-standing quality reputation
- FDA-cleared, CE-marked, and ISO 13485 compliant
- Small, inexpensive, portable, quiet, and safe^{2,3,4}
- Ideal for performing procedures in the outpatient setting
- Ideal for settings with no electricity or with space constraints
- Limited investment required
- Easy to use
